Education

- | | |
|------|---|
| 2023 | Ph.D. in Chemistry , University of Massachusetts Amherst. Advisor: Jianhan Chen, Ph.D. |
| 2018 | B.S. in Chemistry and Physics , The College of Idaho |

Research

Free energy calculations of hydrophobic dewetting in protein pores. Understanding the details of the gating mechanism of ion channels like the big potassium (BK) channel is a crucial for minimizing the effects of many diseases including cancer, stroke, asthma, and epilepsy. I have designed advanced protocols for sampling the free energy of desolvation in nanoscale pores. I used this method to explain the functional effects of experimentally-characterized mutations and to discover the mechanism of action of a known activator of BK.

Predictive modeling of protein function by integrating physics-based simulations and experiments using statistical learning. Predictive molecular models of protein function remain a grand challenge in biophysics, despite recent advances in structural biology and protein structure prediction. Currently there is a gap between structural and functional experimental data and atomistic, physics-based modeling. To bridge the gap, I have enriched available experimental functional data with physics-based modeling to describe the effects of mutations on protein function. Then, I used statistical learning methods to explain existing experimental data and to make novel predictions.

Fellowships and Awards

2023	T32 Cancer Biology Postdoctoral Traineeship , University of Maryland, Baltimore and National Institutes of Health (info)
2022	Paul H. Terry Endowment Award , Chemistry Dept., University of Massachusetts Amherst
2022	Graduate Teaching Fellowship , College of Natural Sciences, University of Massachusetts Amherst (info)
2020 – 22	T32 Chemistry-Biology Interface Graduate Traineeship , University of Massachusetts Amherst and National Institutes of Health (info)
2020	William E. McEwen Poster Award , Chemistry Dept., University of Massachusetts Amherst

Presentations

2022	Talk , University of Massachusetts Amherst ResearchFest; PH Terry Award . “Predicting protein function with physics, experiments and machine learning.” Poster , Biophysical Society Annual Meeting; “Free energy of hydrophobic dewetting in gating of BK channels”
2020	Talk , Northeastern Structural Symposium, “Physical origins of selective promiscuity to Hsp70s revealed through physics-based modeling” Poster , University of Massachusetts Amherst ResearchFest; WE McEwen Award ; “Physical origins of selective promiscuity to Hsp70s revealed through physics-based modeling”
2019	Talk , Biophysics at University of Massachusetts Amherst, “Understanding the origins of DnaK’s selective promiscuity with physics-based modeling” Poster , Molecular Biophysics in the Northeast, “Understanding the origins of DnaK’s selective promiscuity with physics-based modeling”

Teaching

2022	Instructor of record for a self-designed first-year seminar (info)
2020	Guest lecture , Graduate Statistical Mechanics, molecular mechanics and empirical force fields
2018	TA , General Chemistry I Lab Mentoring Undergraduates , Samantha Schultz (2020-2021); Callie Jillson (2019-2020)

Service

2019 – 21	ResearchFest organization committee for Chemistry Dept., University of Massachusetts Amherst
2020, 2022	Alumni Networking Symposium organization committee , Chemistry-Biology Interface program, UMass Amherst
2021	Search committee , Grad Program Manager for Chemistry Dept. University of Massachusetts

Amherst

Journal Referee, Biophys. J. (1 article)

Outreach

- | | |
|------|--|
| 2020 | Reviewer for Journal of Emerging Investigators , 18 articles by middle- / high-school students (info) |
| – | |
| 2022 | Girls summer science camp , Eureka! at University of Massachusetts Amherst (info) |

Professional Development

- | | |
|------|---|
| 2022 | CITRL associate certification (info) |
| 2021 | Evidence-based Undergraduate STEM Teaching , online course (info)
Inclusive STEM Teaching , online course (info) |
